# About Me

I am a results-driven SEO Specialist with hands-on experience delivering measurable organic growth for businesses in competitive markets. With deep expertise spanning Technical SEO, On-Page Optimization, Off-Page Strategy, Local SEO, and AI-powered search optimization (GEO), I combine data-driven analysis with creative content strategy to drive sustainable traffic growth.

This portfolio documents my work for Express Air Logistics, a Bangalore-based international courier company, where I designed and executed a comprehensive SEO campaign achieving significant improvements across all key performance metrics — from search visibility and keyword rankings to domain authority and Core Web Vitals.

# Click-Through Rate (CTR) Analysis

CTR optimization through improved title tags, meta descriptions & schema markup

|                          |                                                                                             |
|--------------------------|---------------------------------------------------------------------------------------------|
| Title Tag Optimization   | Rewrote all page titles with primary keywords, power words, and year (2026).                |
| Meta Description Rewrite | Compelling descriptions with clear value propositions and strong CTAs on all service pages. |
| FAQ Schema               | Structured FAQ schema added to 8 pages, enabling rich result appearances in Google.         |
| Breadcrumb Schema        | Breadcrumb structured data to improve SERP appearance and site navigation clarity.          |

Fig 3: CTR Analysis — Google Search Console Performance (Before vs After)

# Domain Authority & Backlink Growth

Off-page SEO — directory submissions, citation building & content outreach via Moz

|                  |                      |                  |             |
|------------------|----------------------|------------------|-------------|
| 2 → 4            | 10 → 17              | 7 → 14           | 16 → 18     |
| Domain Authority | Linking Root Domains | Ranking Keywords | Homepage PA |
| ↑ +100%          | ↑ +70%               | ↑ +100%          | ↑ +13%      |

# Core Web Vitals & Technical SEO

PageSpeed Insights improvements — manual code-level fixes across the website

|                   |                |                |                     |
|-------------------|----------------|----------------|---------------------|
| <b>34 → 57</b>    | <b>69 → 74</b> | <b>50 → 58</b> | <b>85</b>           |
| Performance Score | Accessibility  | Best Practices | SEO Score           |
| ↑ <b>+68%</b>     | ↑ <b>+7%</b>   | ↑ <b>+16%</b>  | → <b>Maintained</b> |

|                                     |                                                                                   |
|-------------------------------------|-----------------------------------------------------------------------------------|
| <b>Image Optimization</b>           | Compressed & converted images to WebP format, reducing page weight by ~45%.       |
| <b>Render-Blocking Resources</b>    | Deferred non-critical JS and CSS to improve Time to Interactive (TTI).            |
| <b>Server Response Time</b>         | Browser caching implemented and TTFB reduced through hosting optimizations.       |
| <b>Mobile Responsiveness</b>        | Fixed viewport issues and touch target sizes for better mobile UX scores.         |
| <b>HTTPS &amp; Security</b>         | SSL certificate verified, mixed content warnings fixed, HSTS headers implemented. |
| <b>XML Sitemap &amp; Robots.txt</b> | Sitemap updated with all priority URLs; crawl budget optimised via robots.txt.    |
| <b>Structured Data</b>              | Implemented LocalBusiness, FAQ, BreadcrumbList, and Organization schema markup.   |

Fig 5: PageSpeed Insights — Core Web Vitals Before (34) vs After (57)

# Schema Optimisation Report

Structured data implementation — from 1 schema type to 3 schema types

|               |                                                                                    |
|---------------|------------------------------------------------------------------------------------|
| Before        | 1 schema detected — Organization only (0 errors, 0 warnings)                       |
| After         | 3 schemas detected — Organization, LocalBusiness, FAQPage (0 errors, 0 warnings)   |
| Organization  | Business name, URL, logo, telephone, email, and description correctly implemented. |
| LocalBusiness | Added address, geo-coordinates, opening hours, and area served markup.             |
| FAQPage       | Structured FAQ schema added to key service pages for rich snippet eligibility.     |

Fig 6: Schema.org Validator — Before (1 item) vs After (3 items)

# GEO & AI SEO Optimization

Generative Engine Optimization — appearing in AI-powered search responses

Generative Engine Optimization (GEO) is the frontier of modern SEO. By optimizing content for AI-powered search engines, Express Air Logistics now appears as a recommended provider in AI-generated responses across ChatGPT, Google Gemini, and Perplexity.

| AI Platform   | Query Tested                                  | Result   |
|---------------|-----------------------------------------------|----------|
| ChatGPT       | Best international courier in Bangalore       | ✓ Listed |
| Google Gemini | Best international courier services Bangalore | ✓ Listed |
| Perplexity AI | Best international courier in Bangalore       | ✓ Listed |

Fig 7: GEO Report — Express Air Logistics appearing in ChatGPT, Gemini & Perplexity

**Google Analytics 4 confirms real traffic arriving from AI platforms including ChatGPT.com, Perplexity, Microsoft Copilot, Google Gemini, and Claude.ai.**

| Metric            | Mobile      | Desktop     | Total       |
|-------------------|-------------|-------------|-------------|
| Active Users      | 15 (56%)    | 12 (44%)    | 27          |
| Sessions          | 24 (60%)    | 16 (40%)    | 40          |
| Engagement Rate   | 75%         | 50%         | 65%         |
